■ **SIBERIAN EXPERIENCE TUGS UM WILDLIFE BIOLOGY STUDENT** -- UM wildlife biology senior Anne Orlando spent a month last summer at Siberia's Lake Baikal and is already raring to return. One of eight U.S. college students chosen to participate in the Tahoe-Baikal Institute's work-study exchange program, Orlando became part of the Siberian tiger research project, which she'll return to during spring semester. After graduation from UM in May, the 21-year-old hopes to go back to Siberia again to study the even more endangered Siberian leopard. Russian scientists are now writing a proposal for this research. Once it's translated, Orlando will seek funding from wildlife institutes and help put together a four- to five-person research team.
